MOSCOW - Requirements

Must Have

Map for data
Example data - API data
Login system
Data cleaning

Should Have

File upload
Hosted
Secured server

Could Have

Multiple examples - multiple API
Donation Page
Advanced Security Server

Wont have

Fully implemented Donation Page
e.g. Take money

Map Relief

Plan
- Requirements
- Market Analysis
- Project management
  - Work Breakdown
  - Risk Analysis
  - Gantt
  - mind map

Design
- Front End website

Build
- Digital
  - Front End
  - Backend
    - Link
    - Push
- Physical
  - Server
  - Remote Access

Test
- Security
- Website
  - Data Processing
  - Back End
    - unit
    - API
      - Clean
  - Front End
    - Machiny
    - unit
      - inter gration

MapRelief

A mind map / concept diagram centered on **MapRelief**.

Website branch
- Website
  - Design → Front End
    - HTML CSS
    - Java Script
  - Back end
    - PHP → File upload
    - login
    - Donation
  - Map API
    - Google

Data Gathering branch
- Data Gathering
  - Python
    - SQL Lite
    - Path JSON
    - CSV
  - Personal upload
  - API
    - Request
    - Data mining
      - Problem
      - request number

Documentation / Server branch
- Documentation
  - Remote Access
- Server Security
  - Linux
  - Protect Server
  - Sys Admin
